

"The potential you need, to create the income you deserve!"

Unlock Your Earning Potential

The Vitamark Operating System (vOS) unlocks your potential for breakthrough earning. Study the chart at right for a demonstration of our plan's power to put the maximum potential in your hands.

How To Read The Chart

The chart illustrates a hypothetical line of sponsorship that includes your Personal Group and affiliates on your first twenty levels (your line could go deeper, of course, but we capped it at twenty for the demonstration). You'll earn 20% of the volume above 100 Bonus Points (BP) generated by you and your Personal Group, and the percentages indicated in the columns to the right as you achieve Platinum, Diamond, Ambassador and Presidential bonus levels. The final column summarizes the maximum potential on each level.

What The Chart Tells You

With this chart, you can see how each layer of bonuses combines to deliver an overwhelming percentage of compensation. If you're a retailer, imagine earning 34% of the volume up to 100 BP you and your Personal Group generate, and 54% of that volume over 100 BP. That's a remarkably high margin! And if you're a business builder, imagine earning 34% of the volume generated by everyone on your first six levels, in addition to an extra 10% on the first 100 BP of everyone on your first three! That's an incredible number, especially when you consider that the breadth and depth of each level is unlimited. What this chart tells you is that Vitamark delivers the earning potential you need to create the income you deserve.
